Innovative Engineers

Manufacturers of Transformer Radiators

SINCE 1996

SERVING THE TRANSFORMER INDUSTRY

ABOUT US

About Innovative Engineers

Established in 1996, Innovative Engineers is a Vadodara-based manufacturer of transformer radiators. With nearly three decades of experience, we manufacture radiator for power and distribution transformer applications as per IEEMA standards, dimensions and technical requirements.

Our focus has always been on good workmanship, dimensional accuracy, reliable welding, proper testing and timely supply.

WHY CHOOSE US

Why Choose Innovative Engineers

- 🕒 Fast, dependable turnaround
- 🏢 Manufactured as per customer drawings
- ✅ Reliable workmanship and finishing
- 🗨️ Timely response and practical coordination
- 🏭 Transformer radiator manufacturing expertise
- ⚙️ Focus on dimensional accuracy and fitment
- 🔧 Support for customized requirements
- 🌐 Based in Vadodara, Gujarat

OUR PRODUCTS

Transformer Radiators

We manufacture transformer radiator suitable for oil-filled transformer applications. Our radiators are manufactured as per customer drawings and project requirements.

Applications

Power Transformers

Distribution Transformers

Furnace Transformers

Special Purpose Transformers

Customized Transformer Radiators

Manufactured As Per Requirement

Every transformer has different cooling and mounting requirements. We manufacture radiators based on customer drawings and specifications including:

- Radiator size
- Number of elements
- Element arrangement
- Header arrangement
- Flange dimensions
- Mounting requirements
- Bracing and support
- Customer-specific designs

QUALITY ASSURANCE

Quality & Testing

Quality is checked before dispatch with focus on:

- ✓ Dimensional checking
- ✓ Alignment
- ✓ Leakage checking
- ✓ Paint finish
- ✓ Welding quality
- ✓ Flange position
- ✓ Pressure testing
- ✓ Final visual inspection

OUR FACILITY

Equipped for the Full Process

Our manufacturing facility at Vadodara is equipped for fabrication, assembly, testing, painting and handling of transformer radiators. The facility supports:

Radiator fabrication

Welding

Material handling

Inspection

Testing

Painting

Storage and dispatch
